

# CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended June 30, 2012 and 2011

### **BELO SUN MINING CORP.**

# NOTICE OF NO AUDITOR REVIEW OF CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3(3) (a), if an auditor has not performed a review of the condensed interim consolidated financial statements, they must be accompanied by a notice indicating that the interim financial statements have not been reviewed by an auditor.

The accompanying unaudited condensed interim consolidated financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these condensed interim consolidated financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's auditor.

(Expressed in Canadian dollars unless otherwise noted)

### 1. Nature of operations

Belo Sun Mining Corp. ("Belo Sun" or the "Company"), through its subsidiaries, is a gold exploration company engaged in the exploration of properties located in Brazil. The Company is a publicly listed company incorporated in the Province of Ontario. The Company's shares are listed on the Toronto Stock Exchange. The Company's head office is located at 65 Queen Street West, 8<sup>th</sup> Floor, Toronto, Ontario, Canada, M5H 2M5.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, unregistered claims, aboriginal claims and non-compliance with regulatory and environmental requirements.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of interests in mineral properties and the Company's continued existence is dependent upon the preservation of its interests in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise additional financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values. The Company's mining assets that are located outside of North America are subject to the risk of foreign investment, including increases in taxes and royalties, renegotiation of contracts, expropriation and currency exchange fluctuations and restrictions.

#### 2. Significant accounting policies

#### a) Statement of compliance

These condensed interim consolidated financial statements of the Company and its subsidiaries have been prepared in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB"). The policies applied in these condensed interim consolidated financial statements are based on International Financial Reporting Standards ("IFRS") issued and outstanding as at June 30, 2012. The policies as set out in the Company's Annual Consolidated Financial Statements for the twelve months ended December 31, 2011 were consistently applied to all the periods presented unless otherwise noted below. The Board of Directors approved these condensed interim financial statements for issue on August 13, 2012.

#### b) Basis of preparation

These financial statements were prepared on a going concern basis, under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies.

(Expressed in Canadian dollars unless otherwise noted)

### c) Future accounting changes

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRIC that are mandatory for accounting periods beginning after January 1, 2013 or later periods. Updates are not applicable or are not consequential to the Company have been excluded thereof.

IFRS 9, Financial Instruments: Classification and Measurement, effective for annual periods beginning on or after January 1, 2015, with early adoption permitted, introduces new requirements for the classification and measurement of financial instruments. Management anticipates that this standard will be adopted in the Company's financial statements for the period beginning January 1, 2015, and has not yet considered the potential impact of the adoption of IFRS 9.

IFRS 10, Consolidated Financial Statements, establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. This standard (i) requires a parent entity (an entity that controls one or more other entities) to present consolidated financial statements; (ii) defines the principle of control, and establishes control as the basis for consolidation; (iii) sets out how to apply the principle of control to identify whether an investor controls an investee and therefore must consolidate the investee; and (iv) sets out the accounting requirements for the preparation of consolidated financial statements. IFRS 10 supersedes IAS 27 Consolidated and Separate Financial Statements and SIC-12 Consolidation—Special Purpose Entities and is effective for annual periods beginning on or after January 1, 2013, with early application permitted.

IFRS 11, Joint Arrangements, establishes the core principle that a party to a joint arrangement determines the type of joint arrangement in which it is involved by assessing its rights and obligations and accounts for those rights and obligations in accordance with that type of joint arrangement. This standard is effective for annual periods beginning on or after January 1, 2013, with early application permitted.

IFRS 12, Disclosure of Involvement with Other Entities, requires the disclosure of information that enables users of financial statements to evaluate the nature of, and risks associated with, its interests in other entities and the effects of those interests on its financial position, financial performance and cash flows. This standard is effective for annual periods beginning on or after January 1, 2013, with early application permitted.

IFRS 13, Fair Value Measurement, defines fair value, sets out in a single IFRS a framework for measuring fair value and requires disclosures about fair value measurements. IFRS 13 applies when another IFRS requires or permits fair value measurements or disclosures about fair value measurements (and measurements, such as fair value less costs to sell, based on fair value or disclosures about those measurements), except for: share-based payment transactions within the scope of IFRS 2 (Share-based Payments); leasing transactions within the scope of IAS (17 Leases); measurements that have some similarities to fair value but that are not fair value, such as net realizable value in IAS 2 (Inventories); or value in use in IAS 36 (Impairment of Assets). This standard is effective for annual periods beginning on or after January 1, 2013, with early application permitted.

(Expressed in Canadian dollars unless otherwise noted)

IFRIC Interpretation 20, *Stripping Costs in the Production Phase of a Surface Mine* was issued by the IFRIC in October 2011. IFRIC 20 applies to all types of natural resources that are extracted using the surface mining activity process. IFRIC 20 may represent a change in accounting practice for some Canadian mining entities. Specifically, IFRIC 20 permits capitalization of stripping costs if all of the following three criteria are met:

- probability of future economic benefit (improved access to the ore body) flowing to the entity;
- · identifiability of the component of the ore body for which access has been improved; and
- measurability of the costs associated to the stripping activity.

Furthermore, where the costs of the stripping activity asset and of the inventory produced are not separately identifiable, IFRIC 20 provides a more detailed cost allocation guidance based on a relevant production measure that allows allocation between inventory produced and the stripping activity asset. IFRIC 20 is effective for annual periods beginning on or after January 1, 2013. Early application is permitted.

IAS 1, *Presentation of Financial Statements* ("IAS 1"), has been amended to require entities to separate items presented in other comprehensive income ("OCI") into two groups, based on whether or not items may be recycled in the future. Entities that choose to present OCI items before tax will be required to show the amount of tax related to the two groups separately. The amendment is effective for annual periods beginning on or after July 1, 2012 with earlier application permitted. The Company has not yet determined the impact of the amendments to IAS 1 on its financial statements.

## d) Principles of consolidation

#### (i) Subsidiaries

All entities, in which the Company has a controlling interest, specifically when it has the power to direct the financial and operational policies of these companies to obtain benefit from their operations, are fully consolidated from the date that control commences until the date that control ceases.

A controlling position is assumed to exist where the Company holds, directly or indirectly, a voting interest exceeding 50%, and where no other shareholder or group of shareholders exercises substantive participating rights which would enable it to veto or to block ordinary decisions taken by the Company.

A controlling position also exists where the Company, holding an interest of 50% or less in an entity, possesses control over more than 50% of the voting rights by virtue of an agreement with other investors, power to direct the financial and operational policies of the entity by virtue of a statute or contract, power to appoint or remove from office the majority of the members of the Board of Directors or equivalent management body, or the power to assemble the majority of voting rights at meetings of the Board of Directors or equivalent management body. The Company consolidates special purpose entities which it controls in substance because it has the right to obtain a majority of benefits, or because it retains the majority of residual risks inherent in the special purpose entity or its assets.

(Expressed in Canadian dollars unless otherwise noted)

### (ii) Transactions eliminated on consolidation

Intercompany balances and any unrealized gains and losses or income and expenses arising from intercompany transactions are eliminated in preparing the consolidated financial statements.

#### e) Significant accounting judgments, estimates and assumptions

The preparation of these consolidated annual financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. These consolidated annual financial statements include estimates, which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated annual financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised, on a prospective basis. The revision may affect current or both current and future periods.

Information about critical judgments and estimates in applying accounting policies, and areas where assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year are included in the following areas:

- Asset carrying values and impairment charges
- · Estimation of asset lives
- Recognition of deferred tax assets
- Contingencies
- Share-based payments
- Assessment of the project stage for mineral properties and activities
- Estimation of close down and restoration costs and the timing of expenditures
- Estimation of environmental cleanup and the timing of expenditure and related accretion

#### f) Presentation and functional currency

The Company's financial statements are presented in Canadian dollars. The Company's functional and presentation currency is the Canadian dollar. The Company's subsidiaries' functional currency is the United States dollar. These annual consolidated financial statements have been translated to the Canadian dollar in accordance with IAS 21 The Effects of Changes in Foreign Exchange Rates.

#### 3. Prepaid expenses and sundry receivables

|                                      | 30-Jun-12 |         |    | 1-Dec-11 |
|--------------------------------------|-----------|---------|----|----------|
| Trade receivables and other advances | \$        | 161,019 | \$ | 120,155  |
| Prepaid taxes                        |           | 262,663 |    | -        |
| HST/VAT receivable                   |           | 190,735 |    | 248,157  |
| Prepaid insurance                    |           | 39,548  |    | 24,511   |
|                                      | \$        | 653,965 | \$ | 392,823  |

Receivables disclosed above are classified as loans and receivables and are therefore measured at amortized cost.

(Expressed in Canadian dollars unless otherwise noted)

#### 4. Exploration and evaluation expenses and engineering studies

Exploration and evaluation expenditures and engineering studies expensed immediately in the condensed interim consolidated statement of operations and comprehensive loss for the three and six months ended June 30, 2012 collectively amounted to \$9,750,813 and \$17,116,130 respectively (June 30, 2011 - \$4,016,818 and \$7,321,360).

Exploration and evaluation properties comprise the following:

#### a) Volta Grande, Para State, Brazil

The gold project includes approximately 149,918 hectares in twenty-two Exploration Permits (2011 – 103,169 hectares in twenty-two exploration permits) and 46,749 hectares in twelve Exploration Applications (2011 – 49,906 hectares in ten exploration applications) and is situated in the margin of the Xingu river, some 60 km from the city of Altamira, Para State.

Under the agreement, the Company agreed to pay to OCA Mineracao Ltda., an unrelated company whose controlling shareholder is the Tenaris-Confab Group, a total of US\$600,000 of which US\$12,500 was paid in January 2004 and US\$50,000 paid in April 2004 and the outstanding balance was paid in December 2006. OCA Mineracao Ltda. ownership was transferred to the Company in March 2008. The transfer of title to the Volta Grande Property to Belo Sun occurred following the arrangements with Companhia de Pesquisa de Recursos Minerais ("CPRM"), a Brazilian state owned company, whereby the Company has committed to pay CPRM 3,740,000 Reais if a mineable deposit is defined on the Volta Grande Property. As security, the Company purchased a term deposit of 3,740,000 Reais.

In March 2008, the Company successfully renegotiated the agreement with CPRM. Under the new terms, CPRM released to the Company 3,525,087 Reais of the total term deposit of 4,273,087 Reais including accrued interest, held in security to cover the Company's potential debt owed to CPRM. In addition, the Company allocated the balance of the original term deposit that was not released, amounting to 748,000 Reais, to be retained in an interest bearing term deposit to cover future royalty payments. There has been no production at Volta Grande Property thus no royalties payable and no amounts were withdrawn by CPRM.

The Company is committed to paying approximately US\$1,500,000 to CPRM if a mineable deposit is defined on the property, and to invest a minimum US\$1,500,000 at Volta Grande over a two year period. The Company has fulfilled its investment condition on this property.

In May 2012, the Company acquired surface rights for an area covering 1,734 hectares, which was comprised of three distinct properties – *Fazenda Galo de Ouro* covering 824.8 hectares, *Fazenda Ouro Verd*e covering 503.6 hectares and *Fazenda Ressaca* covering 405.9 hectares. The total consideration agreed to be paid for the acquisition was R\$8,200,000 in cash (\$4,190,200) and the issuance of common shares of Belo Sun with an aggregate value of R\$500,000 (\$255,500). The Company paid 50% of the purchase price on signing the definitive agreement, and the balance is to be paid once the vendors complete the demobilization of all "garimpo" (artisanal mining) activities on these properties. The issuance of the common shares of the Company is subject to receipt of approval from the Toronto Stock Exchange. These were not issued as at June 30, 2012. The balance of consideration as well as the value of the common shares to be issued have been recorded as accrued liabilities as at June 30, 2012.

(Expressed in Canadian dollars unless otherwise noted)

#### b) Patrocino, Para State, Brazil

This gold project is situated in the Para State and includes approximately 18,669 hectares (2011 – 18,669 hectares). Pursuant to a signed contract on October 8, 2004 the Company has the right to acquire 100% of the property. Under the terms of the contract, the Company must make 36 monthly payments of US \$1,667 and issue 200,000 common shares of the Company to the original owners. The Company is current on these payments and issued 200,000 common shares at \$0.10 on June 20, 2005. In addition, the property is subject to a 1.5% net smelter royalty and a sliding scale payment during the first two years of production from the property. The payment ranges from 606 ounces of gold assuming 100,000 ounces of proven and probable reserves to 12,121 ounces of gold assuming 1.2 million proven and probable reserve ounces.

The Company is currently assessing its options with respect to the project including, but not limited to, joint-venture scenarios, earn-out arrangements, and further development by Belo Sun.

#### 5. Term investment

The investment consists of a term deposit of 1,042,411 Reais (CDN\$528,711) (December 31, 2011 – 1,005,805 Reais (CDN\$548,968)), including accrued interest, which approximates fair value, to fund the potential amounts owing to CPRM. The term deposit matures on April 22, 2013 and bears interest at a floating rate of approximately 7.89% (December 31, 2011 – 10.2%). The Company intends on rolling over the term deposit on maturity because it is security against the potential amount owing to the CPRM (Note 4(a)) and accordingly, management has shown the investment as a long-term asset.

#### 6. Property, plant and equipment

|  | \$ 6,454,286 | \$ 2,164,777 |

#### 8. Finance leases

Finance leases relate to vehicles with lease terms of 1 to 2 years. The Company has options to purchase the vehicles for a nominal amount at the conclusion of the lease agreements. The Company entered into a new finance lease during the second quarter of 2012 for a new vehicle with a term of 2 years at an interest rate of approximately 19%.

As at June 30, 2012, the finance leases were composed of the following obligations:

| 2012                               | 32,975       |
|------------------------------------|--------------|
| 2013                               | 33,044       |
| 2014                               | 12,926       |
|                                    | 78,945       |

|                                    | \$<br>66,043 |
|                                    |              |
| current portion                    | 44,513       |
| long term portion                  | 21,531       |

#### 9. Share Capital

a) As at June 30, 2012 and December 31, 2011, the Company's authorized number of common shares was unlimited without par value and an unlimited number of special shares. The special shares have the same features as the common shares with the exception that the special shares take preference over the common shares in the event of liquidation, dissolution or winding up of the Company. The special shares are entitled to the same dividend rights as common shares.

(Expressed in Canadian dollars unless otherwise noted)

#### b) Issued and outstanding share capital

|   | Number of<br>Shares | Amount |             |
|---|---------------------|--------|-------------|
| Balance, December 31, 2010                            | 149,158,834         | \$     | 40,829,667  |

| Balance, December 31, 2011                            | 207,604,334         |        | 96,276,107  |
| Exercise of stock options                             | 690,600             |        | 394,554     |
| Exercise of stock options - value allocation          |                     |        | 235,917     |
| Exercise of warrants                                  | 21,515,600          |        | 10,610,850  |
| Exercise of warrants -value allocation                |                     |        | 2,231,085   |
| Balance,June 30, 2012                                 | 229,810,534         | \$     | 109,748,513 |

(i) On March 25, 2011, the Company completed a bought deal financing of 45,080,000 common shares, including the full exercise of the agents' over-allotment option of 5,880,000 common shares, at a price of \$1.15 per common share for gross proceeds of \$51,842,000. The Company paid the underwriters a fee of 6% on funds raised.

#### 10. Share-based payments reserves

The Company has an ownership-based compensation scheme for executives and employees. In accordance with the terms of the plan, as approved by shareholders at a previous annual general meeting, officers, directors and consultants of the Company may be granted options to purchase common shares at exercise prices determined at the time of grant. The Company has adopted a Floating Stock Option Plan (the "Plan"), whereby the number of common shares reserved for issuance under the Plan is equivalent of up to 10% of the issued and outstanding shares of the Company from time to time. The option vesting terms are determined at the discretion of the Board of Directors.

Each employee share option converts into one common share of the Company on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

(Expressed in Canadian dollars unless otherwise noted)

|                   | Number of Options | Weighted average exercise prices (CAD\$) | Value of options |            | Number of Warrants | · · · · · · · · · · · · · · · · · · · |              | TOTAL<br>VALUE   |

<sup>\*</sup> options to be granted and accrued as at June 30, 2012

(Expressed in Canadian dollars unless otherwise noted)

Fair value of share options granted in the period:

During the three and six months ended June 30, 2012, the Company granted 750,000 and 4,220,000 stock options respectively (June 30, 2011: nil and 4,922,000). A value of \$620,000 and \$3,361,300 was recorded to the statement of comprehensive loss for the three and six months ended June 30, 2012 (June 30, 2011: \$nil and \$4,380,758) related to these stock options. The weighted average grant date fair value of the share options granted during the six month period ended June 30, 2012 is \$0.80 (2011: \$0.89). In addition, an accrual for stock-based compensation of \$3,256,200 was recorded during the period related to options that were granted subsequent to the end of the period. Options were priced using the Black-Scholes option-pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioural considerations. Expected volatility is based on the historical share price volatility over the past 5 years. The expected life of the option was calculated based on the history of option exercises.

#### 11. Operating segments

#### Geographical information

The Company operates in Canada, Barbados and Brazil. The Company's information about its assets by geographical location are detailed below.

#### 12. Loss per share

Basic loss per share is calculated by dividing the loss available to common shareholders by the weighted average number of common shares outstanding in the period. Diluted loss per share reflects the potential dilution of common share equivalents, such as outstanding share options and warrants, in the weighted average number of common shares outstanding during the period. In the Company's case, diluted loss per share is the same as basic loss per share as the effects of including all outstanding options and warrants would be anti-dilutive.

(Expressed in Canadian dollars unless otherwise noted)

| Finance lease                            |                                 | -           |                       | 66,044          |    | -           |    | 66,044     |

At June 30, 2012, the Company's financial instruments that are carried at fair value, consisting of cash and cash equivalents and term investment, have been classified as Level 1 within the fair value hierarchy.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below. There have been no significant changes in the risks, objectives, policies and procedures for managing risk during the six months ended June 30, 2012 and 2011.

#### Credit risk

Credit risk arises from the non-performance by counterparties of contractual financial obligations. The Company's primary counterparty related to its cash and cash equivalents and term investment carry an investment grade rating as assessed by external rating agencies. The Company maintains all of its cash and cash equivalents and term investment with major Canadian, British, US and Brazilian financial institutions. Deposits held with these institutions may exceed the amount of insurance provided on such deposits. Sundry receivables consist of GST/HST input tax receivables and management believes that the credit risks associated with these amounts are remote.

The Company's maximum exposure to credit risk at the balance sheet date is the carrying value of cash and cash equivalents, term investment and sundry receivables.

#### Liquidity risk

The Company manages liquidity risk by maintaining adequate cash and cash equivalent balances. The Company continuously monitors and reviews both actual and forecasted cash flows, and also matches the maturity profile of financial assets and liabilities.

As at June 30, 2012, the Company had current assets of \$22,729,368 to settle current liabilities of \$6,505,890.

#### Market risk

#### (a) Interest rate risk

The Company's cash equivalents are subject to interest rate cash flow risk as they carry variable rates of interest. The Company's interest rate risk management policy is to purchase highly liquid investments with a term to maturity of one year or less on the date of purchase.

(Expressed in Canadian dollars unless otherwise noted)

Based on cash and cash equivalent balances on hand at June 30, 2012, a 0.1% change in interest rates could result in a corresponding change in net loss of approximately \$22,000 (December 31, 2011 - \$32,000).

### (b) Currency risk

As the Company operates on an international basis, foreign exchange risk exposures arise from transactions and balances denominated in foreign currencies. The Company's foreign currency risk arises primarily with respect to the United States dollar and Brazilian Reais. Fluctuations in the exchange rates between these currencies and the Canadian dollar could have a material effect on the Company's business, financial condition and results of operations. The Company does not engage in any hedging activity to mitigate this risk.

A strengthening of \$0.01 in the United States dollar against the Brazilian Reais would have decreased net income by approximately \$85,000 for the six months ended June 30, 2012 (June 30, 2011 - \$130,000). A strengthening of \$0.01 in the Canadian dollar against the United States dollar would have decreased accumulated other comprehensive income by approximately \$42,000 for the six months ended June 30, 2012 (June 30, 2011 - \$83,000). At June 30, 2012, one Canadian dollar was equal to 1.0181 United States dollars (June 30, 2011 – 1.0368) and one Canadian dollar was equal to 1.9716 Brazilian Reais (June 30, 2011 – 1.6179).

#### (b) Price risk

The Company will be exposed to price risk with respect to commodity prices, specifically gold. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company. The Company's future operations will be significantly affected by changes in the market prices of these commodities. Prices fluctuate on a daily basis and are affected by numerous factors beyond the Company's control. The supply and demand for gold, the level of interest rates, the rate of inflation, investment decisions by large holders of gold and stability of exchange rates can all cause significant fluctuations in prices. Such external economic factors may in turn be influenced by changes in international investment patterns and monetary systems and political developments.

#### 14. Capital management

The Company manages and adjusts its capital structure based on available funds in order to support the acquisition, exploration and development of mineral properties. The capital of the Company consists of common shares, warrants and options. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The properties in which the Company currently has an interest are in the exploration and development stage; as such the Company is dependent on external financing to fund its activities. In order to carry out planned exploration and development, and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

(Expressed in Canadian dollars unless otherwise noted)

There were no significant changes in the Company's approach to capital management during the six months ended June 30, 2012 and 2011. The Company is not subject to externally imposed capital requirements.

#### 15. Related party disclosures

The condensed interim consolidated financial statements include the financial statements of the Company and the subsidiaries at their respective ownership listed in the following table.

|                                  | Country of incorporation | % equity interest |

(Expressed in Canadian dollars unless otherwise noted)

The amounts outstanding are unsecured and will be settled in cash. No guarantees have been given or received. No expense has been recognized in the current or prior periods for bad or doubtful debts in respect of the amounts owed by related parties.

Compensation of key management personnel of the Company

The remuneration of directors and other members of key management personnel during the period were as follows:

|                      | Three mon   | ths ended  | Six months ended |            |  |  |
|----------------------|-------------|------------|------------------|------------|--|--|
|                      | June 30     | 0, 2012    | June 30, 2012    |            |  |  |
|                      | 2012        | 2011       | 2012             | 2011       |  |  |
| Short-term benefits  | \$1,396,500 | \$ 135,000 | \$1,630,417      | \$ 975,000 |  |  |
| Share-based payments | 2,022,500   | 2,937,000  | 3,997,500        | 2,937,000  |  |  |

Share-based payments include the value of stock options that were accrued at June 30, 2012 but were issued subsequent to the end of the quarter.

In accordance with IAS 24 Related Party Disclosures, key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company directly or indirectly, including any directors (executive and non-executive) of the Company.

The remuneration of directors and key executives is determined by the remuneration committee having regard to the performance of individuals and market trends.

#### 16. Commitments and contingencies

#### (a) Long Term Investment

Under a successfully renegotiated agreement with CPRM (Note 5) in March 2008, the Company maintains an interest bearing term deposit to cover the future royalty payments, starting March 31, 2008. There has been no production at Volta Grande Property thus no royalties were payable and no amounts were withdrawn by the CPRM.

- (b) The Company is party to certain management contracts. These contracts require that additional payments of up to \$4,200,000 be made upon the occurrence of certain events such as a change of control. As the likelihood of these events taking place is uncertain, the contingent payments have not been reflected in these consolidated financial statements. Minimum commitments remaining under these contracts were approximately \$536,000 all due within one year.
- (c) The Company's mining and exploration activities are subject to various federal, provincial and international laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

(Expressed in Canadian dollars unless otherwise noted)

### 17. Income tax

The current tax liability of \$7,091 (December 31, 2011 - \$7,091) represents amount of income taxes payable in respect of current and prior periods. An amount of \$7,091 is recorded as deferred taxes.

### 18. Subsequent events

In July, 4,020,000 stock options were granted to directors, officers, employees and consultants of the Company at an exercise price of \$1.15 expiring five years from the date of grant.
